<sup>1</sup> Pricing for gene expression is based on standard Illumina labeling (from >50 ng total RNA). For smaller amounts of starting material (25-50 ng range of RNA), amplification will be required employing third party amplification kits where additional charges will be applicable. Please contact us for details. Some arrays may only be available in set volumes, please contact us for a quotation.

<sup>2</sup> For project with multiple samples, please contact us for price quotation.

<sup>3</sup> Genotyping of FFPE samples is available with modified protocol. Please contact us for details.

<sup>4</sup> For methylation services, bisulphite-converted DNA is required. Please contact us for details.
